Subject: Procedure code H2023 and IPS Supported Employment services

As part of the USDOJ Performance Plan with Oregon, procedure code H2023 (*Supported Employment*) can only be used by IPS Supported Employment (SE) providers, and only for specific mental health diagnoses.

Later this month, the Oregon Health Authority (OHA) will update the fee-for-service claim system to allow providers to bill for this code only for IPS SE diagnosis codes.

CCOs will need to make the same changes to their claim systems to apply the appropriate limits for this procedure code.

Why is this happening?

Effective January 1, 2017, the Health Evidence Review Commission (HERC) moved code H2023 from the Prioritized List of Health Services to the Ancillary List.

HERC will return H2023 to the Prioritized List effective January 1, 2018.

What should you do?

Please update your systems to allow payment for code H2023 only as shown below.
