

Brian has been enrolled with IPS for 2 years. He is currently working as a dishwasher/custodian and serving as support for peers visiting our local drop in center. Brian enjoys spending time with other peers while engaged in activities. He likes his supervisor because she is nice to him and allows him to work in the kitchen cooking some of his recipes. Brian loves to cook. Since becoming employed, Brian has obtained his driver's license and a car for transportation. With the extra money he receives, he is able to budget his money for insurance and other expenses.

Before receiving assistance from his employment specialist, Brian found himself isolating in his apartment. He was bored, had less money and believed that finding a job was impossible. Supported Employment helped Brian look for jobs and get out of the house. He plans to keep working at the same job as long as they will have him. Brian enjoys working and feels that his friends are proud of him too.
